Fun Facts About Trees

All sorts of fun things start happening in the fall. School starts, the leaves change colors, and birds fly south for the winter. Here are some fun facts about what happens during the fall to trees!

- Trees use their green leaves to help them make food – just like a factory!
- Leaves change colors in the fall because they've stored up all the food they need for the winter. The green color fades away because it isn't needed for the winter.
- Some leaves turn red, yellow or orange. These colors are really there all year, but the green covers it up while the tree is making food!
- New England is most famous for it's beautiful fall trees, but the longest lasting and most colorful leaves are actually in the Appalachian mountains – near Babyland General Hospital, where Cabbage Patch Kids are from!

FALL 2007 Volume XII

Terrific Thanksgiving Turkey Treats

Instructions

- Pre-made Popcorn Balls
- Mini Peanut Butter Cup Candies
- Butterscotch chips
- Candy corn
- Small pretzels
- Frosting (for glue)
- Construction Paper
- Toothpicks
- Scissors

Ingredients:

1. After you get an adult's permission, cut out several feathers from the construction paper for each popcorn turkey you are making.
2. Poke one toothpick through each feather and thread it in and out two or three times. Make sure to leave half of the toothpick out of the feather.
3. Stick the other half of the toothpick into the popcorn ball. Repeat with several feathers to make the turkey's tail.
4. Glue the widest side of a peanut butter cup to the popcorn ball for the head using frosting. Make the two eyes with icing on the narrow side of the peanut butter cup.
5. Glue a butterscotch chip below the eyes using frosting to make the turkey's beak, and glue a candy corn to the bottom of the peanut butter cup for the gobbler.
6. To make the turkey's feet, glue two pretzels to the bottom of the popcorn ball using frosting.

Stained Glass Leaves

What You'll Need:

- Construction paper
- Wax Paper
- Leaves
- Crayon shavings
- Glue
- Scissors
- Iron
- String
- Hole Punch
- Suction cup

Instructions:

This activity requires help from an adult!

1. Collect some fall colored leaves from your yard or nearby park.
2. Fold a 9 ½ by 11 inch piece of wax paper in half. Open it back up. Arrange your favorite leaves on one half of the paper. Spread fall colored crayon shavings around the leaves and fold the top of the wax paper back over it.
3. With a warm iron, carefully melt the wax paper and crayon shavings together.
4. While the wax paper is cooling, cut a piece of 9 ½ by 11 inch construction paper in half. Fold each piece of paper in half. Trace a ½ inch border around three sides (not the folded edge) of both pieces. Cut along the lines and unfold. This will make your frame.
5. Glue one frame to the front of the wax paper and the other to the back.
6. Punch a hole in the top two corners and thread a piece of string through. Tie a knot in the string and hang in a window with a suction cup.
